

Emmanuel H.

Web/Mobile App Developer

• +229 96 42 42 45 • emmanuelholonou.pro@gmail.com • Cotonou, Bénin • English, French

PROFILE

My Name Is Emmanuel Holonou and I am a self taught full stack and mobile app developer with the passion of building good looking, dynamic and highly responsive user interface components by using the MERN stack for website and React Native for mobile APPs. Proficient in translating designs & wireframes into high quality code

EDUCATION

2015 - 2016 | **Baccalaureat**
CEG La Verdure

2016 - 2019 | **Baccalaureat + 3 in English**
University of Abomey-Calavi

EXPERIENCE/WORKS

2021 - 2022 • **Whatgpt/Car Services**
Landing Pages
These are landing pages I built to strengthen not only my frontend skills but also to get familiar with React and JavaScript best practices be it folder structure or components reusability through code splitting.

2021 - 2022 • **NFT Marketplace**
Mobile App and Landing Page
Nft Marketplace is a mobile App built with React Native alongside with it's landing page. This is a cool and modern application with nice UI built to get familiar with some cool features of React Native.

2021 - 2022 • **Goalsetter/Calculator**
Mobile APPs
These are simple projects I built when learning Mobile App development with React Native..They are simple but helped me grasp the concept behind building Mobile App and understanding how the styling is done.
